AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

Claims 1-21 (canceled)

Claim 22 (new): A method of generating a user interface on a display for setting operation conditions through a plurality of entry screens, the method comprising:

displaying one of the plurality of entry screens;

receiving input on the displayed entry screen from a user to set operation conditions;

if the user selects another entry screen, displaying the selected entry screen instead of the current displayed entry screen; and

displaying a window which shows a plurality of setting results set on the plurality of entry screens as a diagram, said diagram having different shapes depending on the setting results.

Claim 23 (new): A method as claimed in claim 22, wherein the window shows the setting results as the diagram by use of icons.

Claim 24 (new): A method as claimed in claim 22, wherein the window shows only some of the setting results.

Claim 25 (new): A method as claimed in claim 22, wherein the window is displayed within entry screens and continues to be displayed even if the entry screen is switched to another entry screen.

Claim 26 (new): A method as claimed in claim 22, wherein the window is displayed in addition to the entry screens.

Claim 27 (new): A method as claimed in claim 22, wherein the window shows the setting results set on the entry screens which are not currently displayed.

Claim 28 (new): A method as claimed in claim 22, wherein the windows shows a setting result with a mark to inform the user that a corresponding operation condition cannot be set.

Claim 29 (new): A method of generating a user interface on a display for setting operation conditions through a plurality of entry screens, the method comprising:

displaying one of the plurality of entry screens;

receiving input on the displayed entry screen from a user to set operation conditions;

if the user selects another entry screen, displaying the selected entry screen instead of the current displayed entry screen; and

displaying a window within entry screens, said window showing a plurality of setting results set on the plurality of entry screens and continuing to be displayed even if the entry screen is switched to another entry screen.

Claim 30 (new): A method as claimed in claim 29, wherein the window shows only some of the setting results.

Claim 31 (new): A method as claimed in claim 29, wherein the window shows the setting results set on the entry screens which are not currently displayed.

Claim 32 (new): A computer readable medium having computer executable instructions for performing steps comprising:

displaying one of the plurality of entry screens;

receiving input on the displayed entry screen from a user to set operation conditions;

if the user selects another entry screen, displaying the selected entry screen instead of the current displayed entry screen; and

displaying a window which shows a plurality of setting results set on the plurality of entry screens as a diagram, said diagram having different shapes depending on the setting results.

Claim 33 (new): A computer readable medium as claimed in claim 32, wherein the window shows the setting results as the diagram by use of icons.

Claim 34 (new): A computer readable medium as claimed in claim 32, wherein the window shows only some of the setting results.

Claim 35 (new): A computer readable medium as claimed in claim 32, wherein the window is displayed within entry screens and continues to be displayed even if the entry screen is switched to another entry screen.

Claim 36 (new): A computer readable medium as claimed in claim 32, wherein the window is displayed in addition to the entry screens.

Claim 37 (new): A computer readable medium as claimed in claim 32, wherein the window shows the setting results set on the entry screens which are not currently displayed.

Claim 38 (new): A computer readable medium as claimed in claim 32, wherein the windows shows a setting result with a mark to inform the user that a corresponding operation condition cannot be set.

Claim 39 (new): A computer-readable medium having computer-executable instructions for performing steps comprising:
displaying one of the plurality of entry screens;
receiving input on the displayed entry screen from a user to set operation conditions;
if the user selects another entry screen, displaying the selected entry screen instead of the current displayed entry screen; and
displaying a window within entry screens, said window showing a plurality of setting results set on the plurality of entry screens and continuing to be displayed even if the entry screen is switched to another entry screen.

Claim 40 (new): A computer-readable medium as claimed in claim 39, wherein the window shows only some of the setting results.

Claim 41 (new): A computer-readable medium as claimed in claim 39, wherein the window shows the setting results set on the entry screens which are not currently displayed.
